## ABOUT THE FOUNDATION

The Children's Cardiomyopathy Foundation (CCF) is a national nonprofit dedicated to finding causes and cures for pediatric cardiomyopathy, a chronic and potentially life-threatening heart disease.

Established in 2002, CCF's goal was to accelerate the search for cures and address the unmet needs of patients. CCF's commitment to fostering research collaborations and facilitating dialogue among physician, medical societies, and federal agencies has led to advances in how patients are managed and supported. More than 445 medical publications and presentations on pediatric cardiomyopathy have resulted from CCF-funded studies and scientific conferences.

Twenty years later, CCF is a global community of families, physicians, and supporters working together to improve outcomes and quality of life for children with cardiomyopathy. CCF continues to strengthen its partnerships with the scientific community and industry while ensuring that the patient perspective is always at the forefront.
